Regarding MB 18-184

My name is Scott Meier, and I am the General Manager and shareholder/owner of KQRA 102.1 FM in Springfield, Missouri.

I am in full support of the MMTC and SSR Communications FM Class C4 / 73.215 proposal to allow eligible Zone II Class A stations to upgrade in power from 6,000 Watts to 12,000 Watts.

KQRA continues to be a primary source for community service and local promotion and programming. Years of promoting and fundraising on behalf of Big Brothers Big Sisters of the Ozarks, allows BBBSO to increase access to *Bigs* for all the underserved “kiddos” in SW Missouri. Engaging in and partnering with KY3 Meteorologists, KQRA is able to provide immediate live weather warnings to our entire listening area. Obviously expansion of that area, would create a great safety net for severe weather.

Please implement the MB 18-184 proposal fully without delay.

Many small broadcasters need this relief.

Sincerely,

Scott Meier

Shareholder/General Manager
